TMx Beta Testing - Study Instructions

CAUTION:

When breathing compressed air or EAN Nitrox during a dive, the diver accepts a certain level of risk. When breathing a Trimix gas or other mix gases during a dive, the risk level increases.

The SCUBAPRO-UWATEC R&D team used all relevant data and the most recent hyperbaric research on Trimix diving to bring the risk level of our Galileo Trimix algorithm to the lowest possible acceptable level. Nevertheless, we can in no way guarantee that breathing Nitrox, Trimix, mixed gases or compressed air during a dive using our Trimix algorithm will eliminate or prevent the risk of serious injury or death from decompression sickness, oxygen toxicity or some other inherent risk.

A Trimix diver using the Galileo Trimix algorithm should be aware of the risk level and be willing to accept that personal risk and bear the full legal responsibility of such risks. If the diver is not willing to accept those risks, including serious injury or death, then he or she should not dive with Galileo Trimix software.

Never risk your life on only one source of information. Eventually, every computer has the potential to fail, so do not depend exclusively upon it and always have a plan for how to handle failures. Use a second computer or carry backup tables and depth/time instrumentation. Obtain the proper training from a recognized agency to gain the requisite technical skills and experience needed for this type of diving. Computer technology is never a substitute for knowledge and training.

This Beta test is not commercially available. User accepts all legal risks including serious injury or death. Refer to manual for full warning details

Instructions:

Application

1. Complete and sign the TMx Beta Test Application
2. Scan the trimix dive log.
3. Send completed application, scanned certification card and dive log to the Regional Coordinator:

Jules Ganier - jganier@scubapro.com – Ph. 619-402-1563

Set-Up

1. Regional Coordinator will contact you with approval and send a Scratch Code for downloading trimix algorithm.
2. If Galileo Sol owner, your computer already has Predictive Multi Gas (PMG) capability. If a Luna or Terra owner, you will need to have already installed PMG capability or purchase a PMG Scratch Code and download the multi-gas capability before downloading TMX.
3. Log onto <http://galileo.uwatec.com> and follow on-line instructions for downloading TMx software with scratch code.
4. Read instructions and manual and install software on your Galileo Computer.
5. Install SmartTrack onto your computer to log your TMx diving.

Test Dives

1. Conduct your trimix dives according to your dive plan as you have in the past and bring your Galileo with TMx along on the dive.
2. Download your Galileo dive profile to SmartTrack.
3. Send a copy of your SmartTrack log to Regional Coordinator on the 1st and 15th of every month or when requested by Regional Coordinator until Beta Test is completed.

Regional Coordinator will report back to you when the Beta Testing is finished and report to you the outcome of the test.

Your cooperation and support for this Beta Test is greatly appreciated.

Galileo

TMx Beta Test - Study Application

Thank you for participating in this beta test of Galileo’s trimix software. Please completely fill out this form, attach a copy of your trimix log book so we may verify your trimix diving experience, and sign this form. When approved for testing we will send you a key generator code either by e-mail or scratch card by mail that will be the password code for downloading TMx software from the website <http://galileo.uwatec.com/>

Name: _____ Date of Birth: _____

Address: _____ E-Mail Address _____

City/Country: _____ Phone: _____

My personal scratch code is to be delivered to:
(indicate the SCUBAPRO Authorized Dealer where you will collect the code if your application is approved) _____

Diver Certification Level _____ Certification Agency _____

Certification Number(s) _____

Trimix Certification _____

Trimix Certification Agency _____

Number of Trimix Dives _____

Copy of Trimix Dive Log (Attached)

Galileo Model Owned (Circle Model) Sol Luna Terra

Galileo Serial Number: _____

By signing this TMx Beta Test Application, I acknowledge that I have read the caution and warnings about trimix diving and agree to the associated risks. I also state that I have the proper training and skills needed to conduct trimix dives, and do not hold SCUBAPRO liable for the safety of my trimix diving.

Print Name: _____ Signature: _____

For SCUBAPRO® use:

Approved for testing: _____

Assigned Key Gen Code: _____
